### OTHER TIPS AND INFORMATION

- When considering a wide band, move up a size from your measurement, for comfort's sake.
- Different countries have different ring-size systems. All sizes listed here are standard American sizes.
- The average woman's ring size is about 6. The average man's ring size is about 10.
- Your ring size will be about half a size larger on your primary hand (i.e. the hand you write with).

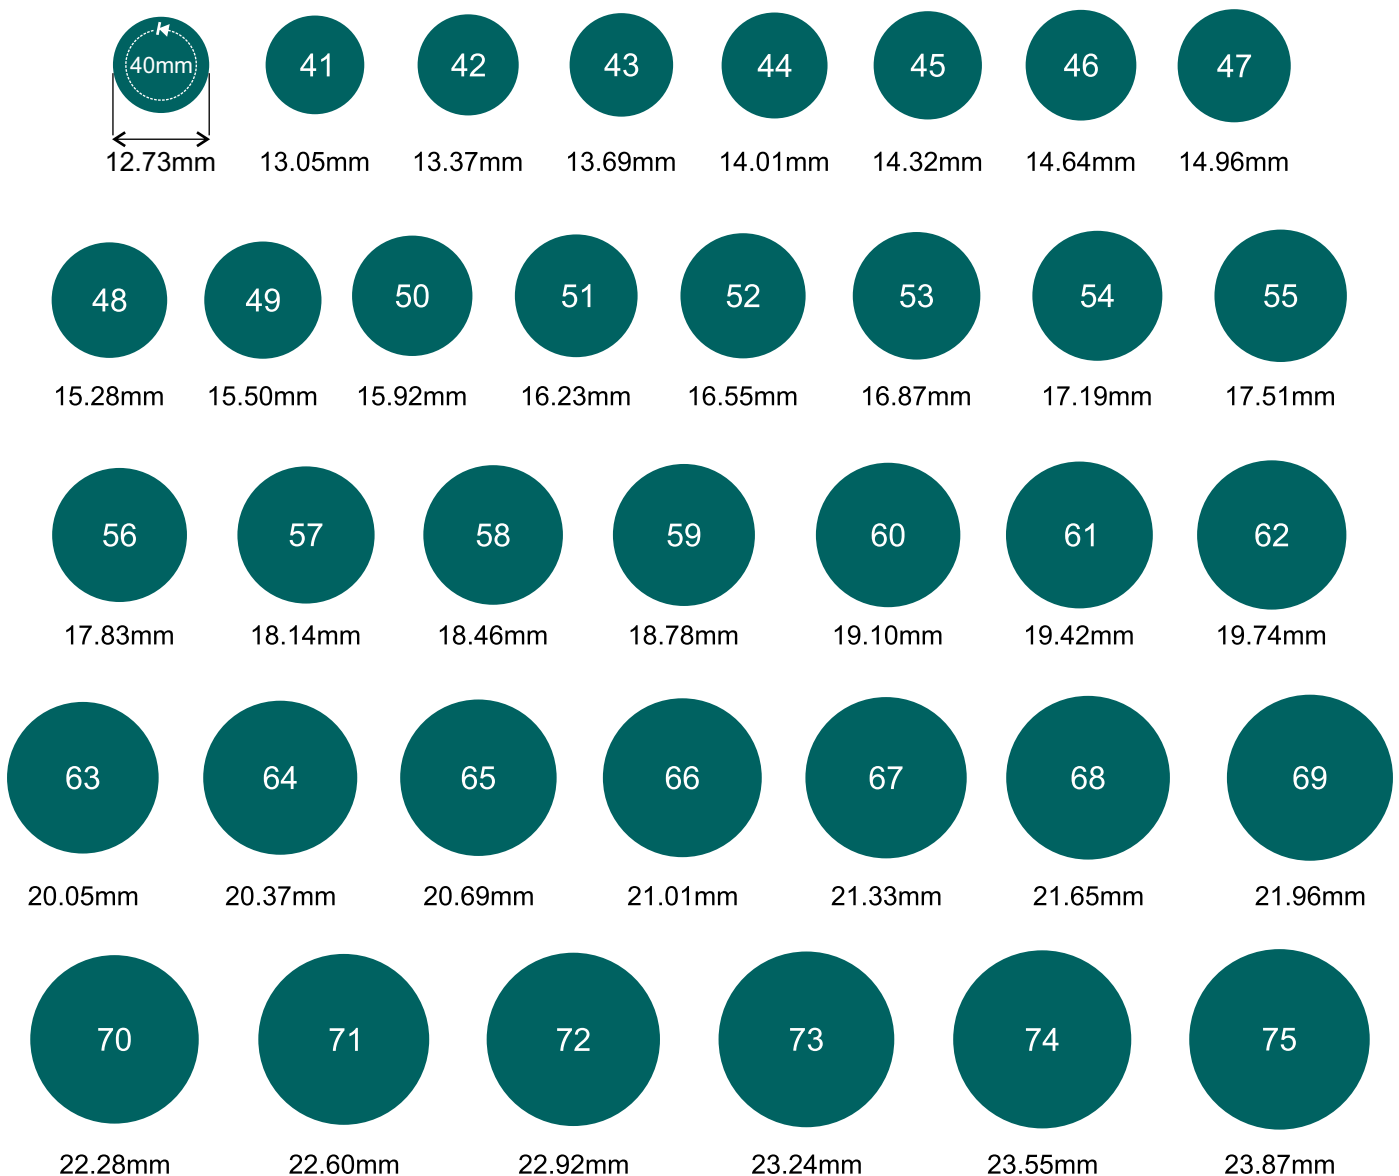

FOR METHOD A

**METHOD A**

Each circle corresponds to the inside diameter of the ring, the number in the middle is the circumference. So as to determine the size of your ring, you can use a ring that you own and whose size is right for you and compare on the chart to find the corresponding diameter. For the fit to be perfect, the circle on the chart should appear on the inside of your own ring, right next to it.

If you are hesitating between two sizes, we advise you choose the larger size.

## METHOD B

---

1. Find a piece of non-stretchy string about 6" (15,24cm) long, or a strip of paper about 6" (15,24cm) long and 1/4" (0,635 mm) wide.
2. Wrap it snugly around the base of your finger.
3. Using a pen, mark the point on the string or paper where it overlaps, forming a complete circle.
4. Compare the length of the string or paper to the lines on the paper below to determine your ring size.  
If you are between sizes, order the larger size.
